Summary of the project (approx. 100 words)

The project leaders from Kyoto University and National Taiwan University, as well as NTU students convened at the “Wild Gardens of Asia Mutual Learning Workshop” in Majia Village, Pingtung, Taiwan in June 2023. This event, organized under the framework of a regional research project on wild edible plants sponsored by the Toyota Foundation, invited ethnic minority group members from Cambodia, Vietnam, Malaysia, and the Philippines to be hosted by the Paiwan community in Taiwan. The KU and NTU project leaders developed new research networks to prepare for future collaboration in Japan about managing natural resources for food systems.
